

# Exercise

- Show all undelivered orders with a ship country Argentina
- For each supplier show the following information:  
Phone is : [phone], fax is: [fax]  
in one column. Name this column phone\_and\_fax
- For each order detail of the order 10250 calculate its value to be paid (use quantity, unitprice and discount)
- For each employee calculate „proposed login“. Combine it from four characters of the first name and three characters of last name. All in lower case
